

Story of children

Although 2020 was a challenging year due to Covid19, ongoing focus on education and developmental therapy for the children has shown excellent results and 3 children are in the process of being transferred to a Special Needs school as the Department of Education Evaluation team has found that they are capable of commencing a more complex learning program.

Join us in congratulating Thabo (age 11), Sipho (age 9) and Sbani (age 7) and wishing them all success and happiness in their new school in 2021!

10 children are in full time residential care and two more children were added as their parents are no longer able to look after them due to their complex disabilities. Services to keep them comfortable and pain-free ensure that the children have quality of life and passive physio and water assist to prevent further contractures and deterioration of their condition.

We welcome you into your beautiful new home
